1.8.2 THE ELECTRONIC TRADE REGISTER READER

The National Center of the Trade Register (from June 2014) has inserted a secure code on the abstract of the trade register. This code is mainly intended to secure this abstract and the online data control and validation.

The reading of this secure code is carried out via a the electronic trade register reader which is a module installed on peripherals equipped with image capturing system (smart phone, tablet,..). This module permits to read and to validate the information linked to the trade register through the online authentication (the internet connection is required).

This module exists in two (02) versions, one is destined for general public and this version permits to identify the trade register holder, whereas the second version is intended for controllers, banks, customers and tax services, this version permits the access to more complete information about the company and the trade register holder.

The information that allowed the authentication of the trade register is:

- The number of the trade register;
- The name and the first name of the tradesman/ company name;
- The Wilaya of inscription.
- The situation of tradesman/company (active or deregistered).

The application and the user's guide can be downloaded from the portal of the National Center of the Trade Register : <https://sidjilcom.cnrc.dz>

III- EVOLUTION DURING THE DECADE : 2007 - 2016

This chapter is a summary of the commercial activities during the decade 2007-2016, the imputation of data is done according to two fundamental aspects: the situation of inscriptions by nature and the density of economic fabric.

3.1 VARIATION OF DIFFERENT INSCRIPTIONS ACCORDING TO THE NATURE, PERIOD : YEAR 2007 - YEAR 2016

The analysis of the curves of inscriptions evolution (registration and deregistration) can be associated with political and social events.

For natural persons :

Evolution of registration :

During the period 2007-2016, the progression of registration has experienced linear growth with the exception of the year 2011 where the rate reached **50,5%** coinciding with facilitations given by public authorities from the beginning of 2011 in favor of youth within the scope of youth employment measures within the scope of the National Agency for the Support of Youth Employment «ANSEJ» and the National Unemployment Insurance Fund «CNAC».

A regression of **28,8%** was recorded during 2012, certainly caused by the decreasing interest among youth towards the measures mentioned above.

During the period 2012-2016, the registration has regressed with the exception of the year 2014 which has registered a little increase of **0,3%**.

Evolution of deregistration :

As regards deregistration, during the year 2010, an exceptional increase of **93,4%** was recorded, this is due to the Implementation of article 39 of (Supplementary Financial Law) for the year 2009 relating to the suppression of tax roll duty discharged which was previously required for any deregistration of the trade register.

The consequences of this provision have progressively stabilized from 2012 (**-37,2%**), then return to normal on 2013 (**+3,4%**).

The decrease of **4,4%** was registered in 2016.

For legal entities :

Evolution of registration :

The curve of registration shows an irregular increase during the period 2007-2016. However, one peak is noticed in 2008 with a rate of **26,2%** the same as the years 2012 and 2014, they have been marked by an increase of **10,7%** and **11,8%**.

The year 2016 increased by **4,7%**.

Evolution of deregistration :

The effects of the application of the article 39 of Supplementary financial law of 2009, have created an exceptional increase in deregistration with a rate of **50,8%** during 2010.

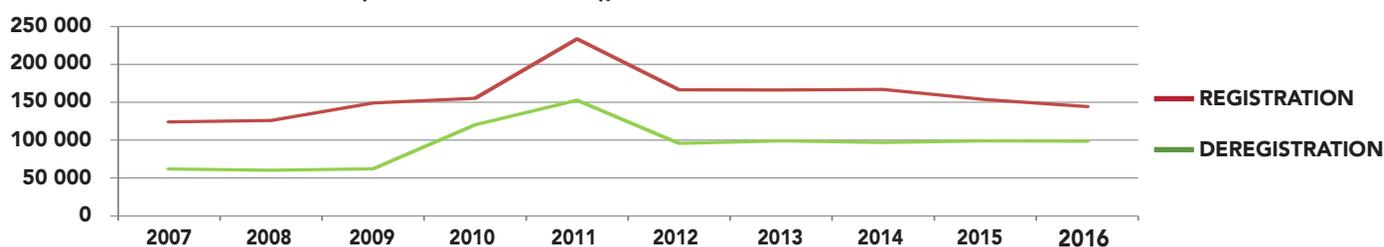

The curve of deregistration shows an increase, except for the year 2009 where a decrease of **4,1%** was noticed and **-19,5%** during 2012, showing the decline of regulations effects mentioned above (Supplementary Financial Law of 2009) in the case of natural persons.

An increase in deregistration with a rates of **9,5%** and **8,3%** are recorded for the years 2014 and 2015, in contrast to 2016 which was reduced to **7,1%**.
