Otherwise, it should be noticed that the total number of deregistration is divided into two categories:

- 94.197 representing 92% of the total number of registers registered or re-registered from the beginning of July 15th, 1997.
- 8.174 representing 8 % of the total number of registers registered in accordance with the previous regulatory provisions and which have not completed the re-registration’s formalities.

III- EVOLUTION OF INSCRIPTIONS TO THE TRADE REGISTER

This chapter is a retrospective of the commercial activity during the decade 2003-2012. This commercial activity is apprehended according to two fundamental aspects: the situation of inscriptions by nature and the density of economic fabric.

3.1 VARIATION OF DIFFERENT INSCRIPTIONS TO THE TRADE REGISTER - YEARS 2003/2012

For natural persons :

Generally speaking, during the period 2003-2011, registrations have recorded an increase, with an exceptional evolution during 2011 that exceeds the rate of 50,5 %.

This situation is certainly related to the facilitations given by public authorities from the beginning of 2011, in favor of youth within the scope of youth employment scheme (National Agency of the Support and Youth Employment - ANSEJ-) and the CNAC. During 2012, we noticed a return to normality, which represents a regression of -28,8%.

As regards deregistration, during the year 2010, an exceptional increase of 93,4% was recorded, this is due to the implementation of article 39 of 2009's supplementary financial law relating to the suppression of tax roll duty discharged which was previously required for any deregistration of the trade register.

From the year 2011, stability has been noticed, with a rate of 26,8 % and a decrease of 37,2% during 2012.

For legal entities :

The curve of registration shows an irregular increase during the period 2003-2012. However, two peaks are noticed, the first one is registered in 2004 with a rate of 23,4 % and the second is registered in 2008 with a rate of 26,2 %.

In the whole, the curve of deregistration shows an increase, except for the year 2009, where a decrease of 4,1% was noticed.

We notice a decrease of 19,5%, predicting a downturn of regulations' effects mentioned above (Supplementary Financial Law of 2009), like the case of natural persons.
