## 1.6 DISTRIBUTION OF INSCRIPTIONS BY ACTIVITIES SECTOR FOR THE YEAR 2017

In terms of inscriptions by sector of activities, the most culminating sectors (two-thirds of inscriptions) are services and retail distribution.

The third remaining is divided in half between the sector of production of goods and the sectors of importation for resale as it is, exportation, wholesale distribution and company of handcraft production.

The sector of exportation (natural persons and legal entities) represents a negligible rate in the total of inscription with only **0,3%**.

### For natural persons :

Concerning registration, retail distribution, services and production of goods sectors are still ahead. They represent respectively **57,10%**, **31,27%** and **8,04%**.

The same sectors record an important number of deregistration : **46,41%** for the retail distribution, **39,57%** for the services and **10,46%** for production of goods.

In matter of alterations, the most important rate was noticed in the sectors of services with **49,64%** followed by retail distribution sector with **36,25%**.

It should be noted that the alterations which have touched the importation for resale as it is sector, concern the issuance of duplicate of the lost trade register in order to permit to the economic operators to carry out deregistration or regulation formalities.

### For legal entities :

Concerning the operations of registration, deregistration and alteration, the sectors of the services, the production of goods and the importation to resale as it is, have marked respectively the following rates :

Registration : **35,3%**, **29,5%** and **12,5%**

Deregistration : **29,2%**, **27%** and **20,1%**

Alteration : **31,5%**, **27,9%** and **23,4%**.

### 1.8.2 THE ELECTRONIC TRADE REGISTER READER

The National Center of the Trade Register (from June 2014) has inserted a secure code on the abstract of the trade register. This code is mainly intended to secure this abstract and the online data control and validation.

The reading of this secure code is carried out via a the electronic trade register reader which is a module installed on peripherals equipped with image capturing system (smart phone, tablet,..). This module permits to read and to validate the information linked to the trade register through the online authentication (the internet connection is required).

This module exists in two (02) versions, one is destined for general public and this version permits to identify the trade register holder, whereas the second version is intended for controllers, banks, customers and tax services, this version permits the access to more complete information about the company and the trade register holder.

The information that allowed the authentication of the trade register is :

- The number of the trade register ;
- The name and the first name of the tradesman/ company name ;
- The Wilaya of inscription.
- The situation of tradesman/company (active or deregistered).

The application and the user's guide can be downloaded from the portal of the National Center of the Trade Register : <https://sidjilcom.cnrc.dz>

### III- EVOLUTION DURING THE DECADE : 2008 - 2017

This chapter is a retroactive of the commercial activity during the decade 2008-2017, the imputation data is done according to two basic perspectives: the situation of inscriptions by nature and the density of economic fabric.

#### 3.1 VARIATION OF DIFFERENT INSCRIPTIONS ACCORDING TO THE NATURE, PERIOD : YEAR 2008 - YEAR 2017

The analysis of the curves of inscriptions evolution (registration and deregistration) can be associated with political and social events.

##### For natural persons :

##### Evolution of registration :

During the period 2008-2017, an exceptional increase of **50,5%** was recorded in 2011 coinciding with facilitations given by public authorities from the beginning of 2011 in favor of youth within the scope of youth employment measures within the scope of the National Agency for the Support of Youth Employment «ANSEJ» and the National Unemployment Insurance Fund «CNAC».

A regression of **28,8%** was recorded during 2012, certainly caused by the decreasing interest among youth towards the measures mentioned above.

During the period 2012-2017, the registration has regressed with the exception of the year 2014 which has registered a little increase of **0,3%**.

##### Evolution of deregistration :

As regards deregistration, during the year 2010, an exceptional increase of **93,4%** was recorded, this is due to the Implementation of article 39 of Supplementary Financial Law for the year 2009 relating to the suppression of tax roll duty discharged which was previously required for any deregistration of the trade register.

The consequences of this provision have progressively stabilized from 2012 (**-37,2%**), then return to normal on 2013 (**+3,4%**).

The decrease of **8,3%** was registered in 2017.

##### For legal entities :

##### Evolution of registration :

The curve of registration shows a regular increase during the period 2008-2017, with exception of two separate regressions noted during 2010 and 2015 with a rate of **8,3%** and **10,7%**.

The years 2012, 2014 and 2017 were marked by an increase of **10,7**, **11,8** and **13,2%**, respectively.

##### Evolution of deregistration :

The effects of the application of the article 39 of Supplementary Financial Law of 2009, have created an exceptional increase in deregistration with a rate of **50,8%** during 2010.

The curve of deregistration shows an increase, except for the year 2009 where a decrease of **4,1%** was noticed and **-19,5%** during 2012, showing the decline of regulations effects mentioned above (Supplementary Financial Law of 2009) in the case of natural persons.

An increase in deregistration with a rates of **9,5%** and **8,3%** are recorded for the years 2014 and 2015, in contrast to 2016 and 2017 which was reduced to **7,1%** and **7,4%**.

## NOTICE TO ECONOMIC OPERATORS

The National Center of the Trade Register informs all economic operators, both natural persons and legal entities, about the new provisions fixed by the Executive Decree n° 18-112 dated 5 April 2018, fixing the model of the trade register extract delivered under electronic format aimed at the substitution of traditional models of trade register extracts by new models endowed with electronic identification code.

In compliance with the Executive Decree mentioned above, an electronic code named electronic trade register «RCE» will be included in the trade register extracts for traders, either naturel persons or legal entities.

The electronic code «RCE» is a bar code that includes encrypted data and information of the trader, either natural person or legal entity.

For this purpose, the traders having old trade register extracts are obliged to modify their trade registers in order to include the electronic code «RCE», within a period of one (01) year from **11 April 218 to 11 April 2019**.

Once this period has expired, the trade register extracts not endowed with the code mentioned above will no longer be valid.

The services of the General Directorate of CNRC and its local offices implanted in the **48** Wilayas, remain completely at the disposal of economic operators for further information.
