PRESENTATION

The article 3 of the law N° 08-12 of June 25th, 2008, modifying and completing the order N° 03-03 of July 19th, 2003, relating to competition which defines the company as follows:

«Company: any natural person or legal entity whatever its nature, carrying constant activities of production, distribution, service or importation...».

On this basis and such as previous years, statistical statement for financial year 2011 of the National Center of the Trade Register provides complete and detailed information concerning the inscriptions of companies to the trade register, except for liberal professions, crafts, trades and agricultural activities, regulated by legislative and regulatory provisions.

For 2011, in matter of inscriptions to the trade register, statement of activities brings out the following key elements:

Remark: The curves representing registration show homogenous distribution, except for May and June that have known considerable increase. Concerning alterations, the curve is steady during all the year. For deregistration, we have noticed the most important increase during the first semester of 2011, representing the period that follows implementation of the article 39 of Supplementary financial law 2009's, starting on July 15th, 2010, which replaces the tax roll duty discharged which was formerly required for any deregistration from the Trade Register by a tax situation's certificate.

GRAPH 2:

Remark: The curves representing registration and deregistration reveal a slight differentiation in accordance with the inscriptions during the year 2011.

It's important to emphasize that alterations have reached peaks, from the beginning of September, since the application of the order of June 13th, 2011 fixing the term validity of the Trade Register's extract issued to economic operators in order to carry out "import-export" and "resale in state" activities. The most considerable number is registered during December 2011.

1.4 EVOLUTION OF THE NUMBER OF DEREGISTRATION FROM THE TRADE REGISTER

The application of provisions contained in article 39 of 2009's Supplementary Financial Law, replaces tax roll duty discharged by certificate of tax situation, since 2 years.

The evolution of deregistration number during 2011, comparing to 2010 is estimated at 25,6%. The number of deregistration for 2010, the beginning of the application of the article 39 mentioned above, have recorded an increase of 90,2% comparing to 2009.

This shows that the number of tradesmen who had difficulties to carry out the deregistration procedure before the application of the article 39

mentioned above, have considerably reduced from month to month, and the effect of the article 39 on tradesmen diminished.

Otherwise, it should be noticed that the total number of deregistration is divided into two categories:

- 138.522 representing 86,2% of the total number of registers registered or re-registered from the beginning of July 15th, 1997.
- 22.144 representing 13,8% of the total number of registers registered in accordance with the previous regulatory provisions and which have not completed the re-registration's formalities.

2.8 DISTRIBUTION OF FOREIGN TRADESMEN AND COMPAGNIES (ACCORDING TO THE MANAGER'S NATIONALITY) REGISTERED TO THE TRADE REGISTER UNTIL 31/12/2011

This chapter exposes statistics concerning foreign tradesmen and companies whose manager or director has foreign nationality, registered to the trade register.

The global number of foreign tradesmen registered to the trade register until 31/12/2011, adds up to 8.605, distributed as follows: 1.964 natural persons and 6.641 legal entities, including 194 branches. (See details on tables 46 and 47).

Regarding legal entities, the most widespread manager's nationalities, are: French (19,89%), Syrian (12,23%), Chinese (9,56%) and Egyptian (7,57%). (See details on table 51).

Concerning natural persons, the most widespread nationalities are: Tunisian (30,3%), Moroccan (22,2%), Syrian (18,64%) and Egyptian (6,82%) (See details on table 49).

The comparison by activity sectors demonstrates that 31,4% of economic operators (companies) are registered in the sector of services, 29,4% in industrial production – building, public works and hydraulic, then 24,5% in the import-export sector.

However, foreign tradesmen (natural persons) are mainly registered in the sectors of retail trade and services, respectively with (70,1%) and (15,7%).

It is important to indicate that from 2007, the foreign tradesman's card is no longer required prior to the registration to the trade register (c.f decree N° 06-454 of December 11th, 2006, relating to the professional card issued to foreigners, notably article 7). This could justify the slight increase in matter of inscriptions of this category of foreign tradesmen, as mentioned below:
